

CHINA FLOOR INSPECTION

Your Eyes In China

Experienced Inspectors
24/7 Support
In-House Test Lab
Customized Solutions

SCOPE OF SERVICE

- ◆ We focus on floor inspection only!
- ◆ CFI inspectors scrutinize your factory, enforce your specification, inspect random units, and identify defects. You are in control of the whole process via our daily reports on quality and progress.

CFI SPECIALIZES IN FLOORING INSPECTION

[Onsite Monitoring]

CFI personnel available to monitor production at factory to ensure all customer product specifications are met

[Final Production Inspection]

CFI can assist in establishing inspection criteria to accommodate final inspection based on customer requirement

[Reporting]

CFI personnel will submit detailed inspection report based on agreed upon format

[Information Verified Includes]

- ◆ Customer PO number and related item information
- ◆ Packing specifications, pallet specifications, product labeling, carton printing, UPC verification
- ◆ Product specifications including shade variation, measurement, floor joint inspection, degree of warp, gap, gloss, moisture content, abrasion testing

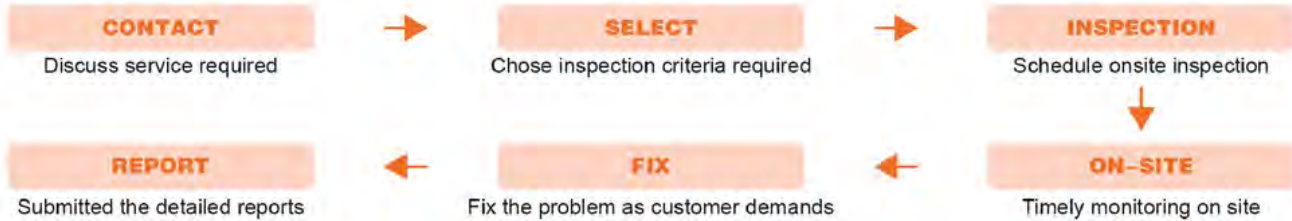

[Additional]

We handle all types of floor: Bamboo, Hardwood, Laminates, Engineered, Decking, WPC, LVT

HOW DO WE WORK

Professional experience and effective communication to help lower your business risks

- ◆ Establish inspection criteria with customer
- ◆ Determine required Inspection/Monitoring services
- ◆ Estimate date CFI personnel to be onsite for inspection
- ◆ Submit detailed report within 24 hours of completed inspection
- ◆ Pass/Fail recommendation to customer based on agreed to inspection criteria
- ◆ Establish corrective action recommendation if applicable
- ◆ Final Acceptance/Rejection by customer

WARRANTY EXCLUSION AND CONDITIONS

We only report facts as observed and data as detected.

Our primary goal is to lower customer risk by identifying and solving problems at prior of shipping.

CHINA FLOOR INSPECTION SERVICE

CFI services available at various stages of production

Factory Qualification

Provide reliable OEM factory information. Establish communication with factory, validate factory production and quality systems, confirm all necessary certifications and standards required based on flooring category.

- Audit previous production records
- Validate production processes and capacity
- Audit quality/process control systems
- Provide summary report of findings

Pre-Production Inspection

Inspection carried out prior to start of production to validate materials, approval samples, color shade, packaging/packing requirements.

Inline Production Monitoring

This inspection is carried out after production has started, monitoring the progress, identifying problems, timely coordinating the factory to improve production process and manufacturing procedure to eliminate defects.

Pre-Shipment Inspection

This inspection occurs when at least 80% of the production is completed. Designed to validate quality, coating, T&G, packaging & packing.

Sample Control

Crucial to producing top quality products is proper management of control samples. Control samples are approved by customer and signed by factory and customer. CFI and factory retain control samples which are used to check and validate final production samples.

Container Inspection

Inspection that validates safe & correct loading procedures are followed as well as confirmation of final shipping quantities.

Laboratory Testing Inspection

Validation of conformity for products requiring special testing or documentation needs. CFI performs quality tests to industry recognized standards: European Standard (EN), Chinese Standard (GB), North American Standard (ANSI), Japanese Standard (JAS).

WHY YOU NEED PROFESSIONAL INSPECTION FOR FLOORING

- Control moisture to prevent splitting
- Monitor balance time to prevent warping
- Inspect glue used for excess formaldehyde levels
- Ensure proper quality at every production stage
- Don't get stuck paying for defective flooring
- Avoid recalls and damage to reputation
- Anticipate production and shipment delays
- Optimize your quality control budget
- Improvement of sourcing efficiency
- CFI oversight will save cost by reducing risk of defective products

Appearance Check

Check for shade variation, surface cracking, fit and finish of floor jointing system.

Density Check

Insufficient material density can result in inconsistent grain appearance and possible surface cracking.

Inspection

WHY YOU NEED PROFESSIONAL INSPECTION FOR FLOORING

Warp Check

Board warp results in installation difficulty, creaking floor noise and possible subfloor structure damage.

Moisture Content Test

The moisture content of the floor is critical to ensure floor structure stability during changes in climate/humidity. Improper board moisture content can result in expansion of boards, causing need for major repair/replacement of floor surface.

CHINA FLOOR INSPECTION

Your Eyes In China

Film Adhesion Test

Test used to confirm proper primer and top coat application. Improper surface coating will result in finish peeling and bubbles appearing on surface of floor.

Paint Wear Resistance Test

Test to validate resistance to scratching and other surface deformation. If floor surface paint wear resistance does not meet standard, scratches might appear after using a period of time.

Dip Peeling Test

Test used to check laminate structure for proper adhesive bonding. Weak adhesive binding might result in deformation, delamination, drum and other issues because of its internal lamination structure, which need strong adhesive binding to overcome the expansion coefficient variation.

Formaldehyde Emission Test

Testing service available to detect excess levels of formaldehyde present in floor. Formaldehyde risk will not only harm health, but also greatly affect the business reputation, and cause serious losses.

Virgin & Recycle Material Check

Verification that no recycled material is used in production process. Use of recycled material can result in excessive swelling, delamination and warping.

WHY US

We do not only discover problems, but also solve them!

[Located in the largest floor production region in China]

CFI has strong knowledge of factories, familiarity with many companies of their reputations, quality and on-time delivery

[CFI is 100% focused in the flooring industry]

Floor inspection established in 1995

Work with 180+ Chinese floor manufacturers

20 onsite engineers available for onsite monitoring and inspection

[Extensive in-house product testing capability]

More than 30 kinds of floor testing equipment for on-site inspections and more accurate tests

[Supply one-stop service plan]

From factory selection/auditing to production monitoring all the way to final inspection and shipment validation

[Customize individual customer approach]

All services can be customized to meet customer needs

As global trade continues to increase, and supply chains get increasingly complex, floor buyers from brands, retailers, importers need increased visibility and control over their manufacturing worldwide.

Our ambition at CFI is to make it easier for our clients to control the quality and compliance of their floor and suppliers through the use of our services.

CFI would like to be your eyes in China floor factories, we do hope to be your best valuable partner in China.

CLIENT TESTIMONIAL

主题: testimonial CHINA-FLOOR-INSPECTION
TO WHOM IT MAY CONCERN

I have been doing business with CHINA-FLOOR-INSPECTION for several years and can highly recommend Peter for providing exceptional service. A few years ago I met peter and told him I was having issues with my various bamboo floor suppliers; they did not provide consistent quality; color was not consistent along with milling and moisture content, etc. Peter has corrected these problems and provided me with good quality products and competitive pricing and reasonable production time.

Best Regards
John Creurer

I have known the owner of China-Floor-Inspection, Peter for about 10 years. He's been a great resource and we entirely have trust in him. In addition, he's been open and honest with pricing. It has always been a pleasure working with him, and will recommend him for any project.
